"Impacting the community through improving lives"

Activity Report for the MFCC-2017

life skills programme.

Interacting with young children on how to care for themselves and avoid risky behavior in order for them to see their brighter future.

a successful meeting with these learners addressing issue of abstinence, these learners were so excited, participated well and pledge to keep themselves save.

Engaging young people in dealing with their challenges together with department of social development, mothers also were present. During the discussion young people were given a chance to voice their feeling, what come out of the discussion was that parents don't have

time to sit with them and have a talk. We reached consensus that parents will be invited to have dialogue with them regarding the challenges they are facing.

We hosted a successful spelling competition for the secondary learners, this has encouraged them a lot, they requested that this kind of an activities should continue every year.

We like to thank everyone who continue to support the work of the Mmametlhake Family Care Centre.
